Media Kit

Snagging, Punch List & Site Auditing
Software For Faster and Smarter Business

PRODUCT BRIEF

SnagTick is a web-based comprehensive snag management solution on cloud with mobile capabilities, designed to make the building inspection process collaborative, efficient and seamless with real-time overview of the construction site.

The application's intuitive interface gives you the ability to assign, resolve tickets and fetch reports in real time. So, whether you're an architect, construction manager, developer or contractor, SnagTick produces detailed records while reducing time and costs in resolving the issues. Your project engineers and quality-control personnel can identify, record and track construction deficiencies in the field, and communicate to subcontractors and owners through automatically generated reports.

SnagTick allows you to focus on real and important work by brilliantly simplifying and streamlining most of your current processes such as progress tracking, report writing, analyzing data, inspection and team coordination. It's responsive & user-friendly dashboard presents summarized insights so that you can make informed decisions and save a lot of time, effort & resources.

BENEFITS

QUICK DECISION MAKING

Real-time access to data for everyone allows senior management & developers to make quick & informed decisions.

EASY & QUICK TEAM COORDINATION & MANAGEMENT

Sharing snags, job assignments, progress reports, change reports has never been easier! Within a few taps & clicks on your device, create customised reporting & response systems in order to automate the processes.

TIME SAVING

Since the team members aren't wasting time in office writing reports & sending emails, SnagTick enables them to utilize their time on actual jobs they're hired for.

INCREASED PRODUCTIVITY & EFFICIENCY

When the team is spared the otherwise mandatory hassles of documentation & coordination, their focus will turn towards their actual tasks which will also promote efficiency.
